Re: replacement of ESRF NIAC member

Dear members of the NeXus International Advisory Committee,

I am writing to you to inform you that the new ESRF NIAC member is Claudio Ferrero. Claudio is a permanent staff member of the ESRF and has worked for many years on data analysis. As leader of the Data Analysis Unit he is aware of the many different areas of research carried out at the ESRF and their needs. He is well placed to coordinate the data format activities at the ESRF. Claudio has followed the Nexus developments over the years and the local developments at the ESRF. I see him participating actively in the evolution of the Nexus standard to serve the needs of the synchrotron community. He replaces Armando Solé as ESRF representative to the NIAC.

Yours sincerely

Jean Susini
Head of the ISDD
